Experience: 3 Years

SUMMARY

Frontend Developer with 3 years of experience building scalable, high-performance React.js applications. Strong focus on performance optimization, clean component architecture, and real-time features, with solid backend knowledge in Node.js, Express.js, and REST APIs. Experienced working in Agile/Scrum teams.

SKILLS

- Frontend:** React.js, Redux, Tailwind CSS, Vite, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Chart.js
- Performance:** Lazy Loading, Memoization, useCallback / useMemo, Bundle Splitting, Code Splitting, Caching Strategies
- Backend:** Node.js, Express.js, REST APIs, PostgreSQL, MongoDB
- Auth:** OAuth 2.0, JWT, Refresh Tokens, Authorization policies, Secure API Access
- Real-Time:** WebSockets, Socket.IO
- Tools:** GitHub, Git, Figma (UI), Netlify, Render, VS Code, Postman

WORK EXPERIENCE

Associate - CCubics	MAR 2023-JULY 2025
- Optimized React.js architecture using Redux, TypeScript, and Vite code splitting, reducing bundle size by 35%. - Implemented Axios caching and interceptors, cutting redundant API calls by 40%. - Built real-time dashboards using Socket.IO and WebSockets for instant UI updates. - Owned frontend integration for 20+ REST APIs, collaborating closely with backend teams. - Improved UI reliability and maintainability by 25% using strict TypeScript patterns.	
Junior Associate - CCubics	OCT 2022 -MAR 2023
- Built responsive UI components using React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS. - Improved page load performance by 30% using lazy loading, memoization (useMemo, useCallback), and code splitting. - Integrated authentication using JWT and OAuth 2.0. - Followed Git & GitHub PR workflows and worked in Agile sprints.	
Trainee - CCubics	JULY 2022 -SEPT 2023
- Built responsive UI components using React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS. - Improved page load performance by 30% using lazy loading, memoization (useMemo, useCallback), and code splitting. - Integrated authentication using JWT and OAuth 2.0. - Followed Git & GitHub PR workflows and worked in Agile sprints.	

PROJECTS

Personal Skill Improvement Projects — linked in portfolio

Chatify

- Developed a real-time chat application using React.js and Node.js + Express.js.
- Implemented live messaging with Socket.IO, ensuring sub-second message delivery.
- Designed responsive UI using DaisyUI / Tailwind CSS for clean, chat-based layouts.
- Managed user sessions and message flow through REST APIs.
- Deployed the application on Render for public access.

Billing Application for Small Startups

- Built a billing and revenue management web application to help small startups track customers, invoices, payments, and revenue from a single dashboard.
- Developed the frontend using React.js, TypeScript, and Tailwind CSS, focusing on clean UI and reusable components.
- Implemented backend APIs using Node.js and Express.js to handle customer management, billing, and CRUD operations.
- Integrated multiple payment methods and real-time updates to reflect payment status instantly.
- Reduced manual billing effort by 40% and operational costs by 25%, based on direct customer feedback.
- Enabled startups to manage business data efficiently, saving significant manpower and time compared to manual processes.

EDUCATION

TAGORE COLLEGE OF ARTS AND SCIENCE

Bachelor of Computer Applications (BCA)

2019-2021
